

SECTION: 1. GENERAL

SUBJECT: APPROPRIATE USE POLICY FOR TECHNOLOGY

Subject: Appropriate use for technology

Background: The purpose of this policy is to discuss proper use of LC STATELC State technology within a collaborative and collegial campus environment.

Point of Contact: Director of Information Technology

Other LC STATE offices directly involved with implementation of this policy, or significantly affected by the policy: Vice President of Institutional Research, Planning & Effectiveness, President, Provost, Vice President for Finance & Administration

Date of approval by LC STATE authority: 3/14/19

Date of State Board Approval: NA

Date of Most Recent Review: August, 2025

Summary of Major Changes incorporated in this revision to the policy: Reviewed with no changes.

1. Introduction

The use of the college's information technology resources is a privilege extended by the institution to authorized users for the purpose of official college business including teaching, learning, research, service, and administration. This **APPROPRIATE USE POLICY FOR TECHNOLOGY** governs the use of the college's information technology resources The college seeks to:

- Protect the confidentiality and integrity of electronic information and privacy of its users, to the extent required or allowed under federal and Idaho state law;
- Ensure that the use of electronic communications complies with the provisions of college policy and state and federal law; and
- Allow for the free exchange of ideas and support of academic freedom.

Since the college cannot protect users from the Internet presence of materials they may find offensive, such materials must not be represented or construed as being approved by the college.

This policy applies to all students, staff, and others while they access, use, or handle LC State's technology resources. In this policy, the term "users" includes – but is not limited to – subcontractors, visitors, visiting scholars, potential students, research associates, grant and contract support personnel, media representatives, guest speakers, and all other non-college entities granted access.

2. General Policy

- A. All users are expected to act in a responsible, ethical, and lawful manner when accessing the college's information technology resources.

SECTION: 1. GENERAL

SUBJECT: APPROPRIATE USE POLICY FOR TECHNOLOGY

- B. The college's information technology resources are provided for use in conducting authorized college business. Using these resources for personal gain, illegal, or obscene activities is prohibited.
- (1) The state of Idaho allows some personal use of these resources, except when such use:
- (a) Is excessive or interferes with the performance of the user's college responsibilities;
 - (b) Results in additional incremental cost or burden to the college's information technology resources;
 - (a) Violates any state or federal law;
 - (b) Is prohibited by a college department's restrictions on personal use.
- C. LC STATE Authorized users are to ensure access to State-issued IT devices are secure from use by unauthorized users and that access is limited to the user to whom the device is assigned.
- D. Users should not expect their internet usage when using the college's information technology resources as private. Similarly, users should not expect their email communications, documents or other information stored on the college's information technology resources to be private. Information stored on the college's information technology resources is the property of the State of Idaho and may be subject to a public records request.

3. Prohibited Activities

- A. All users are expected to act in a responsible, ethical, and lawful manner when using the college's information technology resources. The following examples – although not exhaustive -- are prohibited activities.
- (1) The use of the college's information technology resources to attempt unauthorized use or interference with the legitimate use by authorized users of non-LC State computers or networks, including misrepresentation of his or her identity to other networks (e.g., IP address "spoofing");
- (2) Modification or reconfiguration of the software, data, or hardware of the college's information technology resource (e.g., system/network administration, internal audit, key logging) without appropriate authorization or permission;
- (3) Creating, installing, executing, or distributing any malicious code (including but not limited to viruses, worms, key logger, and spyware) or any other surreptitiously destructive program on any of the college's information technology resource, regardless of the result;
- (4) "Hacking" (attempting to gain access to unauthorized areas) into college computers, applications, or networks. (*Note: This activity may be subject to prosecution by state or federal authorities. LC State will notify law enforcement immediately upon detection of any network or system intrusion.*);
- (5) Copyright infringement not covered in legislation aimed at educational institutions, including the illegal possession or sharing of:

SECTION: 1. GENERAL

SUBJECT: APPROPRIATE USE POLICY FOR TECHNOLOGY

- (a) video files,
 - (b) digital audio, and/or
 - (c) writings;
- (6) Using electronic equipment attached to college resources to capture data packets;
 - (7) Launching *denial of service* attacks against other users, computer systems, or networks;
 - (8) Use of the college's information technology resources to transmit incendiary, abusive, threatening, or harassing material, chain letters, SPAM, or communications prohibited by Idaho or federal laws;
 - (9) Knowingly interfering with the security mechanisms or integrity of the college's information technology resources. Users shall not attempt to circumvent information technology protection schemes or exploit security loopholes;
 - (10) Connecting electronic devices (switches, routers, hubs, computer systems, key loggers, and wireless access points as examples) to the college network that are not approved by the Information Technology department;
 - (11) Intentionally physically damaging or disabling college computers, networks, or software without authorization.
 - (12) Removing any computer component or equipment from LC STATE's campus without prior approval of the Information Technology department or the relevant division representative.
 - (13) Use entertainment software and games or play games from state owned computers unless determined as part of official college business by supervisor.
- B. Users observing any illegal activities should report their observance to LC State's administration. Although not an inclusive list, examples include theft, fraud, gambling, copyright infringement, illegal file sharing, audio or video piracy, hacking, and viewing or distributing of pornographic images and videos.
 - C. State law prohibits the use of college resources for campaign or political advertising on behalf of any party, committee, agency, or candidate for political office. This prohibition does not forbid use of college resources to discuss or examine political topics or issues of public interest so long as the use of college resources does not advocate for or against a particular party, committee, agency, or candidate.
4. Department and Division Responsibilities
- A. Each departmental unit is responsible for security on its computer systems in partnership with the Information Technology Services department and may apply more stringent security standards than those detailed here. However, any elaboration of constraints must follow the principles and rules in this policy statement as a minimum standard, or risk losing connectivity to the college's networks and/or use of its resources.

SECTION: 1. GENERAL

SUBJECT: APPROPRIATE USE POLICY FOR TECHNOLOGY

- B. LC STATE Whenever information technology equipment/property is being disposed or transferred to another state agency, a Surplus Property Disposal Form must be completed and sent to the Purchasing Department and the ITS department for appropriate removal.

5. Remediation

- A. Abuse of college policies, resources, or abuse of other sites through the use of information technology resources may result in termination of access, disciplinary review, expulsion, termination of employment, legal action, and/or other appropriate disciplinary action. Notification will be made to the appropriate LC State office (*e.g., appropriate office for student conduct matters, human resources, general counsel, office of public safety*) or external law enforcement agencies.
- B. The ITS department is authorized to isolate and/or disconnect computer systems from the network while assessing any suspected or reported security incident in order to minimize risk to the rest of the college's network.

6. Software

- A. Users may only download software approved the ITS department for direct business use and must take all necessary actions to have such software properly licensed and registered as required.
- B. If software includes a license agreement that details restrictions on its use, the college expects employees and/or students to follow the provisions in the license agreements regarding copying, improvements, number of concurrent users, and similar provisions.
- C. Questions about computer software use not addressed by this policy or questions about specific license agreements should be directed to ITS department.

7. Privacy

- A. The college has no generic interest in tracking electronic mail, reading digital files, or monitoring patterns of digital behavior. However, since all resources are owned by the state of Idaho and made available for employment purposes, there should be no expectation of individual/personal privacy of information stored on or sent through college-owned information technology resources and communications infrastructure.
- B. The college reserves the right to preserve or inspect any information transmitted through or stored in its computers, including e-mail communications stored in the cloud and individual login sessions. No notice will be forthcoming when:
 - (1) There is reasonable cause to believe the user has violated or is violating this policy, any campus or institute guideline or procedure established to implement this policy, or any other college policies;
 - (2) A college account appears to be engaged in unusual or unusually excessive activity;

SECTION: 1. GENERAL

SUBJECT: APPROPRIATE USE POLICY FOR TECHNOLOGY

- (3) It is necessary to protect the integrity, security, or functionality of the college's information technology resources or to protect the college from liability; or
- (4) The college receives a legal subpoena for specific information.
